### Power module 6v dc DC6V-PCB2

#### POWER CONSUMPTION

|                |                                 |
|----------------|---------------------------------|
| Power mode     | DC                              |
| Voltage        | 6V                              |
| Input current  | 2200mA @4.2V DC / 800mA @10V DC |
| Output current | 1500mA                          |

#### MATERIAL AND DIMENSIONS

|                       |                 |
|-----------------------|-----------------|
| Dimensions            | 98 x 70 x 17 mm |
| Net weight            | 25 g            |
| Weight with packaging | 80 g            |

#### GENERAL INFORMATION

|               |                           |
|---------------|---------------------------|
| Type          | Power module 6V DC        |
| Compatibility | Hub 2 / Hub 2 Plus / ReX2 |
